

# EMAIL MARKETING and MARKETING AUTOMATION for Microsoft Dynamics CRM

ClickDimensions is a software-as-a-service marketing automation solution that adds email marketing, web intelligence, lead scoring, social discovery, event management, campaign tracking, and form and survey capture functionality to Microsoft Dynamics CRM.

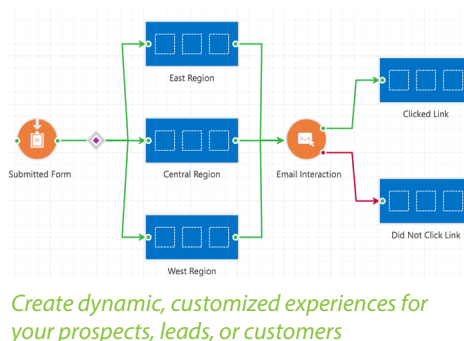

## EMAIL MARKETING

ClickDimensions built-in email marketing capability makes creating, sending and tracking great looking emails quick and easy. Send bulk email to marketing lists, send email to individuals directly, or trigger emails to be sent by CRM workflow. All tracking comes back into CRM so the results are visible and actionable.

## CAMPAIGN AUTOMATION

Put your sales and marketing campaigns on auto-pilot with ClickDimensions' campaign automation builder. Our drag-and-drop interface allows you to easily build automated campaigns with a variety of triggers, timers, and actions. Design unique paths for contacts or leads to follow as they interact with your marketing messages.

## WEB INTELLIGENCE

Discover who is interested in your products and services by viewing the actual web activity of anonymous and identified visitors on your website. Interested in which companies and organizations are browsing your site and what interests them? Want to know what a specific prospective customer has viewed on your site before making the opening call? ClickDimensions allows you to do all this and more.

# LEAD SCORING

As ClickDimensions tracks individual visitor activity on your website, each visitor accumulates a score based on his or her visits, page views, email clicks and more. Scoring is based on default values you set, but you may also score certain pages higher or lower based on their importance in showing visitor intent. Using the lead score, your sales team can quickly and easily determine which leads to pursue.

# FORM INTEGRATION

ClickDimensions makes it easy to create web forms with our drag and drop designer. You can also integrate your website's existing forms into Microsoft Dynamics CRM. When a visitor completes a form, his or her email address is checked against all email addresses in CRM to avoid duplicate data. Lead or contact records can be created for visitors who are not already in your CRM and all the data the visitor submits on the form is linked to their CRM record.

A screenshot of the ClickDimensions Form Designer interface. It shows a form with five fields: "First Name \*", "Last Name \*", "Company \*", "Email \*", and a "CAPTCHA" field. The interface includes a "FORM DESIGNER" tab and an "ACTIONS" tab.

*Use our drag and drop designer to quickly create forms and embed them into your website*

# SURVEYS

ClickDimensions makes it easy to create surveys with our drag and drop survey designer. The surveys may be emailed to leads, contacts and accounts and may even be linked to case records. Surveys may also be posted as pages so they can be completed by anonymous visitors. When a respondent completes a survey, all the data the visitor submits is linked to their CRM record.

*Incorporate skip logic into your surveys to skip questions and pages based on certain answers*

# SOCIAL DISCOVERY

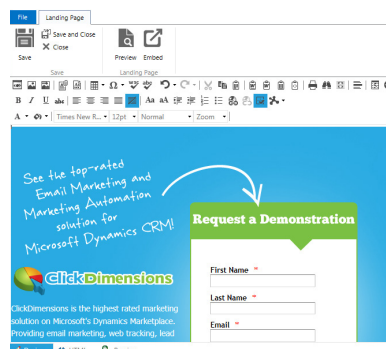

ClickDimensions uses the latest social discovery techniques to find publicly available prospect information from the social web. ClickDimensions social discovery will bring back data and direct links to the lead or contact's identities from a variety of social networks including LinkedIn, Facebook, Twitter, YouTube and Flickr.

*View social information in the ClickDimensions profile, or easily embed social profiles anywhere on your CRM lead and contact records*

# LANDING PAGES

ClickDimensions allows marketers to create landing pages in Microsoft CRM. You can insert any HTML and your page will be available on the internet. You can even embed any ClickDimensions form into the page and link the page to a CRM campaign record so that all visits that initiate on the landing page will be linked to the CRM campaign.
